Bloomington

Dear Jo-

Could I ask you for a copy of the paper you gave at Chicago? I want eventually to start discussing some problems of eugenics in "Science and Man" and want to be sure to give your views the fairest and most uptodate representation.

In due season, would you care to write your own guest column? The best occasion might be as a possible corrective later after I have started to develop my own approaches in a few pieces.

Sincerely,

H.J.
MULLER
